WSS
The WSS water cooled split condensing units are for use in residential or commercial air conditioning applications and offer high cooling efficiencies (EERs), as they operate at low condensing temperatures.

These compact units can be placed virtually anywhere indoors and connected to an evaporator in the furnace or with a matching air handler. The heat rejected as hot water can be gainfully used for heating domestic water or for other applications. Available sizes range from 12,000 BTU/H to 60,000 BTU/H in a selection of voltages and phases.

The condensing units are enclosed in a galvanized steel cabinet equipped with a high efficiency compressor. Safety features and controls include: a factory mounted water regulating valve, a filter drier, and a high pressure limit control. **Units are shipped with a nitrogen holding charge** and service valves to allow refrigerant to be added on site.

The WSS line is covered by a warranty that includes 5 years for the Compressor and 1 year on all parts.

WPS (Vertical package)/ WHS (Horizontal package):

Comfort-Aire offers a complete line of water cooled air conditioners in a wide range of capacities, from 12,000 BTU/H to 120,000 BTU/H, with up to 360,000 BTU/H by special order, in a selection of voltages and phases. Each unit is shipped individually packaged, fully charged with R410a and ready for installation and start up. All of the necessary components are included: water condenser, evaporator, multi speed blower, compressor and a factory-installed, field-adjustable, water regulating valve. Safety features and controls include a fan relay control, 24 volt transformer, contactor, factory installed high pressure limit control, and a lockout relay.

LEFT HAND RETURN

WPS and WHS lines are covered by a warranty that includes 5 years for the Compressor and 1 year on all parts.
